Vertical Mill

THE RELIABILITY  
OF EXPERTISE

MILLING RANGE

# MECMILL

## THE RELIABILITY OF EXPERTISE

- \_ Wear resistant milling chamber with cooling jacket
- \_ Grinding shaft made with impellers and spacers in compound material
- \_ Product filtering and unloading system
- \_ Volumetric feeding pump with adjustable output
- \_ Temperature controlled by PT100 probe and thermostat with 2 set points
- \_ Pressure controlled by pressure gauge with 2 set points

## ADVANTAGES

- \_ Easy flow adjustment according to the product
- \_ Product flow adjustable with mechanical speed regulator
- \_ Effective milling and easy cleaning due to the reduced space in the milling chamber
- \_ No need for surveillance

| MODEL | MOTOR<br>[HP] | FLOW RATE<br>[l/h] | WIDTH<br>[mm] | HEIGHT<br>[mm] | DEPTH<br>[mm] |
|-------|---------------|--------------------|---------------|----------------|---------------|
| MM 2  | 4             | 4 - 36             | 880           | 1630           | 800           |
| MM 6  | 12            | 12 - 108           | 1000          | 1700           | 850           |
| MM 12 | 25            | 24 - 216           | 1000          | 1750           | 900           |
| MM 24 | 40            | 48 - 430           | 1100          | 2150           | 1350          |
| MM 36 | 60            | 125 - 860          | 1300          | 2300           | 1500          |
